PROFESSIONAL SUMMARY

Computer Science graduate from Africa University with hands-on experience in software development, frontend/backend engineering, artificial intelligence, automation, and enterprise application development. Skilled in designing and building scalable web applications, RESTful APIs, database-driven systems, and automation solutions using modern technologies. Knowledge in JavaScript, TypeScript, Python, Java, React, Node.js, Docker, Git, and software engineering principles. Recognized student leader with proven ability to learn quickly, solve complex problems, collaborate in teams, and deliver innovative technology solutions. Passionate about DevOps, cloud technologies, infrastructure automation, and modern software delivery practices, with practical experience gained through industry attachment, personal projects, technical training, and continuous learning.

CORE COMPETENCIES

Software Development | Backend Development | Frontend Development | REST API Development | Database Design | Object-Oriented Programming | Problem Solving | Software Testing | Artificial Intelligence | Automation | Git & GitHub | Agile Collaboration | Technical Documentation

TECHNICAL SKILLS & TOOLS

Languages: JavaScript, TypeScript, Python, Java

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Flask, Django, FastAPI

Databases: MongoDB, MySQL, PostgreSQL, Database Design

DevOps & Tools: Docker, Kubernetes, Postman, N8N

Version Control Git, GitHub

Operating System: Linux, Windows, MacOS

Methodologist: Agile Development, Software Development Life Cycle (SDLC)

Concepts: REST APIs, Microservices, System Design, Authentication & Authorization

PROFESSIONAL EXPERIENCE

Software Developer Intern / Attachee

NetOne Private Limited, Zimbabwe

2025 October – 2026 June

- Developed and maintained web applications using **React.js, Java, MySQL, MongoDB, and PostgreSQL**.
- Participated in system design, testing, and implementation of enterprise software solutions.
- Conducted website reviews and recommended improvements for usability and performance.
- Provided application support, troubleshooting, and user assistance for internal systems.
- Collaborated with developers and stakeholders to deliver reliable and scalable solutions.

LEADERSHIP EXPERIENCE

President, Google Developer Student Club (GDSC), Africa University | 2023–2025

- Led a community of over 100 student developers.
- Organized technical workshops, hackathons, and software development bootcamps.
- Mentored student teams building real-world software and AI solutions.

Deputy Speaker Student Parliament Africa University | 2024–2025

- Supported governance and digital transformation initiatives.
- Facilitated communication between students and university administration.

Web Development Tutor

For Life Zoe Academy | 2021

- Trained 30+ students in modern web development, achieving **60% improvement in course completion rates**
- Designed practical, project-based curriculum focused on **real-world application development**

PROJECT EXPERIENCE

PathoGuide – AI Clinical Decision Support System

Technologies: React.js, Python, FastAPI, PostgreSQL

- An AI-powered decision support platform designed to provide real-time insights, automated lab integration, and evidence-based treatment suggestions to combat Antimicrobial Resistance.
- Built scalable APIs and modular backend services.
- Implemented workflow automation and data-driven processes.

Smart School Management System

Technologies: React.js, Node.js, Express.js, MongoDB

- Developed a full-stack enterprise application for student and administrative management.
- Designed backend architecture and database models for scalable operations.
- Automated key institutional processes and reporting workflows.

Counselling Management System

Technologies: React.js, Flask, MongoDB

- Built role-based application supporting appointments, reporting, and notifications.
- Implemented secure authentication and authorization mechanisms.

PharmTrack – Medicine Availability & Pharmacy Discovery Platform

Technologies: React.js, Node/Express.js APIs

- A medicine discovery platform that allows users to search for a medication and instantly see which nearby pharmacies have it in stock, including pricing and contact information. The goal was to reduce the time patients spend moving from pharmacy to pharmacy searching for medicine.

CERTIFICATIONS

Git & GitHub -Udemy | Kubernetes Hands-On for Beginners - Udemy | Docker & Containerization - Udemy

Microservices with Node.js & React - Udemy | Complete Node.js Developer - Udemy

Postman API Testing - Udemy | Prompt Engineering - Udemy | Artificial Intelligence Fundamentals - Udemy

AI for Project Management - Udemý | Result-Based Management, Monitoring & Evaluation - Udemý

Java Programming - Udemý | N8N Automation - Udemý

EDUCATION

Bachelor of Science (Honours) in Computer Science

Africa University, Zimbabwe

Graduated: 6, June 2026

Degree Classification: Second Class Honours

Language

English - Fluent
